

PROJECT INFORMATION

Exclusive Living Munich, Unterhaching

Building contract:	General planning and construction management Special building constructions Component optimising by concrete core activation Use of ecological insulation in the form of a roof superstructure system. By a high thermal capacity of approx. 2000 J/kgK, the low thermal conductivity of 0.40 W/mK and a mass of 170 kg/m³ a phase shift in the temperature curve of up to 15 hours is achieved.
Client:	Community of constructors Winkler-Loher, Unterhaching
Total investment:	1,5 Mio. EUR
Planning/implementation:	2004
